

RS-232 to RS-485 or RS-422 SIGNAL LEVEL ADAPTER WITH GALVANIC UNBINDING

Features:

- Enables full duplex data transmitting with galvanic unbinding between supported interfaces: RS-232, RS-485, RS-422
- Full/half duplex option
- Data transmitting rate up to 19,2 kbps
- It is possible to increase the noise resistance of the data transmitting
- Power supply voltage (9...24)V

- Connect your RS-485 or RS-422 equipment in a simple and safe way to the RS-232 standard interface. For example, your TBox or WirelessCOM.
- Increase the length of the RS-232 data transmitting lines, for more than kilometer, by using two converters.
- It is possible to have two options: with optical unbinding and without
